

## **Management's Discussion & Analysis**

**For the year ended  
July 31, 2011**

*The following discussion and analysis of the operations, results, and financial position of the Company for the fiscal year ended July 31, 2011 should be read in conjunction with the July 31, 2011 Audited Financial Statements and the related Notes. The effective date of this report is November 1, 2011. All amounts are expressed in Canadian dollars unless otherwise noted.*

### **OVERVIEW**

Discovery-Corp Enterprises Inc. (the "Company") was incorporated under the laws of British Columbia on May 6, 1986. The Company is an exploration stage company engaged in the exploration for base and precious metals. The Company holds an undivided 50% interest in the mineral rights associated with Rock Creek Ranch located in Humboldt County, Nevada, USA and a 100% interest in seven mineral claims and two Crown-granted mineral claims covering approximately 91 hectares located in the Kamloops Mining Division in southern British Columbia, Canada referred to as the Galaxy Property.

The Galaxy Property is situated in the north-eastern portion of the Iron Mask batholith, seven kilometres southeast of the past-producing Afton mine and four kilometres northwest of the former Ajax mine. Previous drilling on the property outlined a fault-bounded zone of copper-gold porphyry-style mineralization, known as the Galaxy zone. The zone measures approximately 345 meters in length by 120 meters in width, and has a maximum depth of about 120 meters. Mineralization is truncated at depth by a low-angle west-southwest dipping fault.

The Company has incurred significant losses since inception and has an accumulated deficit of \$5,411,212 (2010 - \$5,255,432). The recoverability of amounts shown for resource property interests and the Company's continued viability is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete their development, and upon future profitable production from or proceeds from the disposition of its interests. The Company's ability to continue as a going concern is dependent upon the ability of the Company to obtain the necessary financing to meet its obligations and pay its liabilities arising from normal business operations when they come due. There are no assurances that the Company will be successful in achieving these goals and these factors raise substantial doubt as to the Company's ability to continue as a going concern.

### **FORWARD LOOKING STATEMENTS**

The Management Discussion and Analysis is based on a review of the Company's operations, financial position and plans for the future based on facts and circumstances as of July 31, 2011. Except for historical information or statements of fact relating to the Company, certain information contained herein constitutes forward looking statements. Forward looking statements are based on the opinions, plans and estimates of management at the date the statements are made and are subject to a variety of risks, uncertainties and other factors that could cause the actual results to differ materially from those projected by such statements. The primary risk factors affecting the Company are discussed further under the heading "Risk Factors" below. The Company undertakes no obligation to update forwarding looking statements if circumstances or management's estimates, plans or opinions should change.

The reader is cautioned not to place undue reliance on forwarding looking statements.

## Management's Discussion & Analysis

For the year ended  
July 31, 2011

### **SELECTED ANNUAL INFORMATION**

The following are highlights of financial data on the Company for the most recently completed three financial years:

Expressed in Canadian \$

	2011	2010	2009
Loss before other items	(176,384)	(188,090)	(228,867)
Net (loss) income	(155,780)	(157,601)	(267,256)
(Loss) income per share	(0.004)	(0.004)	(0.008)
Total assets	385,414	206,072	325,640
Total liabilities	16,214	11,017	17,984
Working capital (deficiency)	345,284	171,139	283,740

### **DEVELOPMENTS DURING THE YEAR ENDED JULY 31, 2011**

The Company completed a model of Galaxy designed to assess the potential for mineralization on the property beyond the limits of the known Galaxy zone. Results are encouraging. Two areas with geochemical and geophysical signatures of similar character to that at the Galaxy zone were identified. Both of these areas are untested by previous drilling.

Two early 1960's drill holes reportedly tested this zone of mineralization; however results from this historic drilling are unavailable. Further work is required to test the significance of this area of mineralization.

During the year ended July 31, 2008, a survey of historic drill collars and the property boundary discovered historic survey plans showing the position of the former Bill Nye claim. Reference is made in the 1913 BC Minister of Mines Annual Report to copper mineralization on the Bill Nye claim, to the northwest of the Galaxy zone. This supports the concept of a possible continuation of the Galaxy zone mineralization to the northwest of the property.

Several old pits with copper mineralization were discovered in this area during the 2006 and 2007 exploration program, however until now there was no certainty that these workings were in fact the "lost" Bill Nye showing. The historic survey plans have confirmed this, and further confirmed that the Bill Nye showings are within the boundaries of the current Galaxy property.

The Company obtained a digital database compiled in 1996 by the former operator on the Galaxy property. The database includes most of the historic drill holes (approximately 130 drill holes). This data, together with the historical survey plans has advanced the project. The Company has successfully converted this data into digital format and created a series of cross sections to assist with the interpretation of the data to 3D model the Galaxy deposit. Once drill permits are in place the Company will commence a drill program on the Galaxy.

Management will continue investigating new exploration opportunities identified as having favorable potential to enhance the Company's resource property interests.

## Management's Discussion & Analysis

For the year ended July 31, 2011

### OPERATION RESULTS FOR THE 4<sup>TH</sup> QUARTER ENDED JULY 31, 2011 COMPARED TO 3<sup>RD</sup> QUARTER

Net loss for the 4<sup>th</sup> Quarter ended July 31, 2011 was \$58,586 an increased loss of \$7,208 when compared to the 3<sup>rd</sup> Quarter loss of \$51,378. The Loss Before Other Items for the 4<sup>th</sup> Quarter 2011 of \$56,748 represents an increase of \$13,161 when compared to the 3<sup>rd</sup> Quarter of 2011 Loss Before Other Items loss of \$43,587.

### SUMMARY OF QUARTERLY RESULTS

Quarter Ended	2011			2010				2009
	Jul. 31 Q4	Apr. 30 Q3	Jan. 31 Q2	Oct. 31 Q1	Jul. 31 Q4	Apr. 30 Q3	Jan. 31 Q2	Oct. 31 Q1
Income (Loss) Before Other Items	(56,748)	(43,587)	(45,105)	(30,944)	(46,535)	(44,254)	(39,471)	(57,830)
Basic Loss Per Share	(0.0015)	(0.0012)	(0.0012)	(0.0008)	(0.0013)	(0.0012)	(0.0011)	(0.0016)
Net Income (Loss)	(58,586)	(51,378)	(50,945)	5,129	(104,292)	8,124	(39,087)	(22,346)
Basic Loss Per Share	(0.0016)	(0.0014)	(0.0014)	0.0001	(0.0029)	0.0002	(0.0011)	(0.0006)

Expressed in Canadian dollars

### RISK FACTORS

The reader is cautioned that the following description of risks and uncertainties is not all-inclusive as it pertains only to conditions currently known to management. There can be no guarantee, or assurance, that other factors will or will not adversely affect the Company.

#### *Risks Inherent in the Exploration and Development Business*

Exploration and development involve a high degree of risk and few properties are ultimately developed into producing mines. There is no assurance that the Company's future exploration and development activities will result in any discoveries of commercial bodies of ore. Whether an ore body will be commercially viable depends on a number of factors including the particular attributes of the deposit such as size, grade and proximity to infrastructure, as well as mineral prices and government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals, and environmental protection. The exact effect of these factors cannot be accurately predicted, but the combination of these factors may result in a mineral deposit being unprofitable. Availability of skilled people, equipment and infrastructure (including roads, posts, power supply) can constrain the timely development of a mineral deposit. Even after the commencement of mining operations such operations may be subject to risks and hazards, including environmental hazards, industrial accidents, unusual or unexpected geological formations, ground controls problems and flooding. The occurrence of any of the foregoing could result in damage to or destruction of mineral properties and production facilities, personal injuries, environmental damage, delays or interruption of production, increases in production costs, monetary losses, legal liability and adverse governmental action. Insurance coverage against certain risks, including certain liabilities for environmental pollution, may not be available to the Company or to other companies within the industry. In addition, insurance coverage may not continue to be available at economically feasible premiums, or at all. Any such event could have a material adverse effect on the Company.

## **Management's Discussion & Analysis**

**For the year ended  
July 31, 2011**

### ***Competition for Mining Properties***

The mining industry in which the Company is engaged is in general, highly competitive. Competitors include well-capitalized mining companies, independent mining companies and other companies having financial and other resources far greater than those of the Company. The Company competes with other mining companies in connection with the acquisition of mineral properties. In general, properties with a higher grade of recoverable mineral with economically viable deposits afford the owners a competitive advantage in that the cost of production of the final mineral product is lower. Thus, a degree of competition exists between those engaged in the mining industry to acquire the most valuable properties. As a result, the Company may eventually be unable to acquire attractive mining properties.

### ***Financing and Market price***

Historically, the Company has raised funds through equity financing and the exercise of options and warrants to fund its operations. Financing through the issuance of common shares is affected by certain market conditions including the price of metals. The market price of metals is highly speculative and volatile. Instability in the market price may affect investor interest in mining stocks. If the metal prices substantially decline, this may adversely affect the Company's ability to raise sufficient capital to fund operations including exploration. The current uncertain global market conditions have significantly reduced the Company's ability to finance operations.

### ***Seasonality***

Currently the Company's exploration has been focused on the Galaxy Property in British Columbia. The property lies within an area that is semi-arid, with hot summers, little rainfall and with temperatures typically exceeding 30° C during summer months. Winters are relatively mild with little snowfall and with average temperatures just below freezing. Short "cold-snaps" where temperatures drop to -20° C are common. Although winter may last from November to April, exploration is possible year-round. In the summer months access to the property may be limited if there are access restrictions imposed to monitor the risks of forest fires.

### ***SIGNIFICANT ACCOUNTING POLICIES***

These consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles ("GAAP") using the Canadian dollar as the Company's functional and reporting currency. The following reflects the significant accounting policies:

(a) Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, Prebble Resources USA, Inc. (a Nevada corporation). All significant intercompany balances and transactions have been eliminated.

(b) Interest Income

Interest income derived from cash is recognized on an accrual basis as earned at the stated rate of interest.

## Management's Discussion & Analysis

For the year ended  
July 31, 2011

### **SIGNIFICANT ACCOUNTING POLICIES (continued)**

#### (c) Resource Property Interests

The Company is in the exploration stage and capitalizes all acquisition costs related to its resource property interests until such time as the properties are put into commercial production, sold or abandoned. The Company expenses all exploration expenditures in the period incurred. Amounts shown as resource property interests represent acquisition costs incurred to date less amounts amortized and/or written off, and do not necessarily represent present or future values.

If a property is put into commercial production, the acquisition costs relating to that property will be depleted based upon the proven reserves available.

From time to time the Company may acquire or dispose of a resource property pursuant to the terms of an option agreement. As the options are exercisable entirely at the discretion of the optionee, the amounts payable or receivable are not recorded. Option payments are recorded as property costs or recoveries when the payments are made or received. When the amount of recoveries exceeds the total amount of capitalized costs of the property, the amount in excess of costs is recorded in income.

The carrying values of resource property interests are reviewed by management on a property-by-property basis at each financial statement date to determine if they have become impaired. If impairment is determined to have occurred, the resource property interest will be written down to its fair value. The ultimate recoverability of the amounts capitalized for the resource property interests is dependent upon the delineation of economically recoverable ore reserves, the ability to obtain the necessary financing to complete their development and the ability to realize profitable production or proceeds from the disposition thereof. Management's estimates of recoverability of the Company's investment in various projects are based on current conditions. However, it is possible that changes could occur in the near term, which could adversely affect management's estimates and may result in future write-downs of capitalized property carrying values.

#### (d) Asset Retirement Obligations ("ARO")

The Company recognizes an estimate of the liability associated with an ARO in the financial statements at the time the liability is incurred. The estimated fair value of the ARO is recorded as a long-term liability, with a corresponding increase in the carrying amount of the related asset. The liability amount is increased each reporting period due to the passage of time and the amount of accretion is charged to earnings in the period. The ARO can also increase or decrease due to changes in the estimates of timing of cash flows or changes in the original estimated undiscounted cost. Actual costs incurred upon settlement of the ARO are charged against the ARO to the extent of the liability recorded. At July 31, 2011 and 2010, the Company has determined that it has no material AROs to record in these financial statements.

#### (e) Mining Exploration Tax Credits ("METC")

The Company recognizes METC receivable amounts from the government and records those amounts as a recovery in the period in which recoverability can be established and the amount quantified.

## **Management's Discussion & Analysis**

**For the year ended  
July 31, 2011**

### ***SIGNIFICANT ACCOUNTING POLICIES (continued)***

#### **(f) Stock-Based Compensation**

The Company accounts for stock-based compensation using a fair value based method with respect to all stock-based payments, to directors, employees and non-employees. For directors and employees, the fair value is measured at the date of grant. For non-employees, the fair value is measured on the earlier of the date at which the counterparty performance is completed or the date the performance commitment is reached or the date at which the equity instruments are granted if they are fully vested and non-forfeitable. The fair value is accrued and charged either to operations or resource property interests, with the offset credit to contributed surplus. For directors and employees the fair value is recognized over the vesting period, and for non-employees the fair value is recognized over the related service period. If and when the stock options are ultimately exercised, the applicable amounts of contributed surplus are transferred to share capital.

#### **(g) Flow-Through Common Shares**

Flow-through shares entitle a company that incurs certain resource expenditures in Canada to renounce them for tax purposes allowing the expenditures to be deducted for income tax purposes by the investors who purchased the shares. The proceeds from shares issued under flow-through share financing agreements are credited to share capital and the tax benefits of the exploration expenditures incurred under these agreements are renounced to the purchaser of the shares. The tax impact to the Company of the renunciation is recorded on the date that the renunciation is filed with taxation authorities, through a decrease in share capital and the recognition of a future tax liability. A portion of the future income tax assets that were not previously recognized, due to the recording of a valuation allowance, are recognized as a recovery of income taxes in the consolidated statement of operations and deficit.

#### **(h) Equity Units**

Proceeds received on the issuance of units, consisting of common shares and warrants, are allocated to common shares and warrants on a residual value basis. The value allocated to the common shares is based on the market price of the shares and the residual, if any, is allocated to the warrants.

#### **(i) Use of Estimates**

The preparation of financial statements in conformity with Canadian GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Significant areas requiring the use of estimates include the determination of environmental obligations, the recoverability of resource property interests, valuation allowance for future tax assets, determination of the variables used in the calculation of stock-based compensation and accrued liabilities. While management believes the estimates are reasonable, actual results could differ from those estimates and could impact future results of operations and cash flows.

## Management's Discussion & Analysis

For the year ended  
July 31, 2011

### **SIGNIFICANT ACCOUNTING POLICIES (continued)**

#### (j) Loss Per Share

Basic loss per share is calculated using the weighted average number of common shares outstanding during the year. The Company uses the treasury stock method to compute the dilutive effect of options, warrants and similar instruments. Under this method the dilutive effect on earnings per share is calculated presuming the exercise of outstanding options, warrants and similar instruments. It assumes that the proceeds of such exercise would be used to repurchase common shares at the average market price during the year. However, the calculation of diluted loss per share excludes the effects of various conversions and exercise of options and warrants that would be anti-dilutive.

Shares held in escrow, other than where their release is subject to the passage of time, are not included in the calculation of the weighted average number of common shares outstanding.

#### (k) Income Taxes

The Company follows the asset and liability method of accounting for income taxes. Under this method, future tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis, and losses carried forward. Future tax assets and liabilities are measured using substantively enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on future tax assets and liabilities of a change in tax rates is recognized in operations in the period in which the change is enacted or substantially assured. The amount of future income tax assets is limited to the amount of the benefit that is more likely than not to be realized.

#### (l) Financial Instruments

All financial instruments are classified as one of the following: held-to-maturity, loans and receivables, held-for-trading, available-for-sale or other financial liabilities. Financial assets and liabilities held-for-trading are measured at fair value with gains and losses recognized in net income. Financial assets held-to-maturity, loans and receivables, and other financial liabilities are measured at amortized cost using the effective interest method. Available-for-sale instruments are measured at fair value with unrealized gains and losses recognized in other comprehensive income (loss) and reported in shareholders' equity. Any financial instrument may be designated as held-for-trading upon initial recognition. When a decline in the fair value of an available-for-sale financial asset has been recognized in comprehensive income, and there is objective evidence that the impairment is other than temporary, the cumulative loss that had been previously recognized in accumulated other comprehensive income is removed from accumulated other comprehensive income and recognized in net income even though the financial asset has not been de-recognized.

Transaction costs that are directly attributable to the acquisition or issue of financial instruments that are classified as other than held-for-trading, which are expensed as incurred, are included in the initial carrying value of such instruments. The Company provides information about its financial instruments measured at fair value at one of three levels according to the relative reliability of the inputs used to estimate the fair value:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

## **Management's Discussion & Analysis**

**For the year ended  
July 31, 2011**

### ***SIGNIFICANT ACCOUNTING POLICIES (continued)***

#### (m) Future Accounting Changes

##### *International Financial Reporting Standards ("IFRS")*

In February 2008, the Canadian Accounting Standards Board confirmed that Canadian GAAP for publicly accountable enterprises will be converged with IFRS effective for fiscal years beginning on or after January 1, 2011.

Therefore, the Company will be required to report using IFRS commencing with its unaudited interim consolidated financial statements for the three months ending October 31, 2011, which must include restated interim results for the prior period ended October 31, 2010 prepared on the same basis.

The Company has identified current Canadian GAAP applicable to the Company that will be affected by the change-over and differences with the corresponding IFRS and has outlined appropriate policy choices allowed under IFRS. Management informed the Audit Committee about the differences between current Canadian GAAP and IFRS, appropriate policy choices and their impact on the Company's consolidated financial statements and business processes.

### ***FINANCIAL INSTRUMENTS***

The Company has designated its cash and marketable securities as held-for-trading; reclamation bonds as held-to-maturity; and accounts payable and accrued liabilities as other financial liabilities.

#### (a) Fair Value

The carrying values of cash, reclamation bonds, and accounts payable and accrued liabilities approximate their fair values due to the short-term maturity of those financial instruments. The marketable securities are carried at fair value.

As the carrying values of the Company's financial instruments approximate their fair values, disclosure is not made of their level in the fair value hierarchy.

#### (b) Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or counter party to a financial instrument fails to meet its contractual obligations. The Company has minimal credit risk on its financial assets due to cash being placed with major financial institutions.

#### (c) Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in obtaining funds to meet its financial obligations as they become due. The Company manages its liquidity risk by forecasting cash flows required for operations and anticipated investing and financing activities.

At July 31, 2011, the Company's cash totaled \$340,216 (2010 - \$100,221) and accounts payable and accrued liabilities totaled \$16,214 (2010 - \$11,017). Accounts payable and accrued liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

## **Management's Discussion & Analysis**

**For the year ended  
July 31, 2011**

### ***FINANCIAL INSTRUMENTS (continued)***

#### (d) Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign currency risk and other price risk.

##### (i) Interest rate risk

The Company is not exposed to significant interest rate risk due to the short-term maturity of its monetary current assets and current liabilities.

##### (ii) Foreign currency risk

The Company is not exposed to significant foreign currency risk.

##### (iii) Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices, other than those arising from interest rate risk or foreign currency risk. The Company is exposed to significant other price risk with respect to its marketable securities. Assuming all other variables remain constant, a 50% decrease or increase in the market price of the Company's marketable securities would result in a \$8,750 decrease or increase, respectively, in the Company's net loss and comprehensive income or loss.

The Company's exposure to and management of credit risk, liquidity risk and market risk related to financial instruments above have not changed materially since July 31, 2010.

### ***CAPITAL MANAGEMENT***

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern in order to pursue the development of its resource property interests. In the management of capital, the Company includes the components of shareholders' equity as capital. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, option its resource property interests for cash and/or expenditures or dispose of assets. In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary.

The Company has not changed its capital risk management strategy during the year ended July 31, 2011 and is not subject to externally imposed capital requirements.

### ***RESOURCE PROPERTIES***

#### ***Reclamation Bonds***

The reclamation bonds are comprised of a cash deposit plus term deposits held in a financial institution as security for reclamation obligations pursuant to the *Mines Act* and Health, Safety and Reclamation Code for Mines in British Columbia. The term deposits bear interest at .75% per annum and mature September 19, 2012.

## **Management's Discussion & Analysis**

**For the year ended  
July 31, 2011**

### ***RESOURCE PROPERTIES (continued)***

#### ***Mineral Interests***

The Company holds an undivided 100% interest in seven mineral claims and two Crown-granted mineral claims covering approximately 91 hectares in the Kamloops Mining Division of British Columbia, Canada, known as the Galaxy Property.

By an agreement dated April 8, 1987 and March 6, 1987, the Company acquired an undivided 50% interest in the mineral rights associated with Rock Creek Ranch located in Humboldt County, Nevada, USA. Consideration was \$120,000 (US \$100,000) and 1.25% net smelter returns. The Company has written the property off for accounting purposes by a charge to operations in the year ended July 31, 2006, but it retains its interest for viable projects in the future.

The Company is in the exploration stage and capitalizes all acquisition costs related to its resource properties until the properties are put into commercial production, sold, or abandoned. Under this method, the amounts shown as resource properties represent costs incurred to date less amounts amortized and/or written off, and do not necessarily represent present or future values. If a property is put into commercial production, the acquisition costs relating to that property will be depleted based upon the proven reserves available. If a property is sold or abandoned, the costs relating to the property will be charged to operations.

The carrying values of resource properties are reviewed by management on a property-by-property basis at each financial statement date to determine if they have become impaired. If impairment is determined to have occurred, the resource property will be written down to its fair value. The ultimate recoverability of the amounts capitalized for the resource properties is dependent upon the delineation of economically recoverable ore reserves, the ability to obtain the necessary financing to complete their development and the ability to realize profitable production or proceeds from the disposition thereof. Management's estimates of recoverability of the Company's investment in various projects are based on current conditions. However, it is possible that changes could occur in the near term, which could adversely affect management's estimates and may result in future write-downs of capitalized property carrying values.

#### ***Environmental***

The Company is subject to the laws and regulations relating to environmental matters in all jurisdictions in which it operates, including provisions relating to property reclamation, discharge of hazardous material and other matters. The Company may also be held liable should environmental problems be discovered that were caused by former owners and operators of its properties and properties in which it has previously had an interest. The Company conducts its mineral exploration activities in compliance with applicable environmental protection legislation. The Company is not aware of any existing environmental problems, related to any of its current or former properties that may result in material liability to the Company.

Environmental legislation is becoming increasingly stringent and costs and expenses of regulatory compliance are increasing. The impact of new and future environmental legislation on the Company's operations may cause additional expenses and restrictions. If the restrictions adversely affect the scope of exploration and development on the mineral properties, the potential for production on the property may be diminished or negated.

**Management's  
Discussion  
& Analysis**

**For the year ended  
July 31, 2011**

**RESOURCE PROPERTIES - Mineral Interests (continued)**

**Title**

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to all of its mineral properties and, to the best of its knowledge, title to all its properties are in good standing. However, such properties may be subject to prior agreements or transfer and title may be affected by undetected defects.

**Realization**

The investment in mineral properties comprises a significant portion of the Company's assets. Realization of the Company's investment in these assets is dependent upon the confirmation of legal ownership, the attainment of successful production from the properties or from the proceeds of their disposal.

**Exploration Expenditures**

The Company incurred \$147 in exploration expenses in the year ended July 31, 2011 and \$24,637 in the year ended July 31, 2010.

Expense	2011	2010
Geological Consulting	\$ -	\$ 24,490
Government fees and misc.	147	147
	<b>\$ 147</b>	<b>\$ 24,637</b>

**Derivatives – Mineral Properties**

The Company retains and/or has obligations relating to certain carried interest rights and net smelter royalties that value of which is derived from future events and commodity prices. These rights are derivative instruments. However, the mineral interests to which they relate are not sufficiently developed to reasonably determine value.

**MARKETABLE SECURITIES**

The Company holds 100,000 common shares in Abacus Mining & Exploration Corporation ("Abacus"), which were acquired in 2004. The fair value of the shares is based on the quoted market price on the TSX Venture Exchange.

	2011	2010
	Fair Value	Fair Value
Abacus 100,000 common shares (2010 – 400,000)	\$ 17,500	\$ 80,000

## **Management's Discussion & Analysis**

**For the year ended  
July 31, 2011**

### **RESULTS OF OPERATION FOR THE YEAR ENDED JULY 31, 2011**

*The review of results of should be read in conjunction with the Audited Financial Statements of the Company for the fiscal years ended July 31, 2011 and 2010.*

The net loss for the year ended July 31, 2011 was \$155,780 or \$(0.004) per share compared to a net loss for the fiscal year ended July 31, 2010 of \$157,601 or \$(0.004) per share. Interest income decreased from \$1,389 in 2010 to \$732 in 2011. Operating expenses for the 2011 fiscal year were \$176,384 compared to \$188,090 in fiscal 2010. Stock-based compensation in fiscal 2011 was \$nil the same as in 2010. General and administrative expenses for the fiscal year ended July 31, 2011 were \$176,237 compared to \$163,453 in the 2010 fiscal year. Investor relations increased from \$5,863 in 2010 to \$11,348 in 2011. The expense relates to investor relation services aimed at bringing the Company to the attention of the investing public. Management consulting fees increased by \$3,500 and travel decreased from \$19,628 in 2010 to \$18,686 in 2011. Professional fees increased from \$21,878 in fiscal 2010 to \$28,360 in fiscal 2011.

### **LIQUIDITY AND WORKING CAPITAL**

#### **Cash flow**

Cash used in operating activities was \$172,302 in fiscal 2011 compared to \$193,905 for the 2010 fiscal year. Administrative expenses used \$176,237 in 2011 compared to \$163,453 in 2010. Interest income provided cash for operating activities of \$732 compared to \$1,389 provided in 2010. Financing activities in fiscal 2010 provided net cash of \$45,000 compared to net cash provided by financing activities for the year ended July 31, 2011 of \$329,925 which included:

- (i) On September 23, 2009, the Company issued 2,250,000 units at a price of \$0.02 per unit pursuant to a private placement for cash proceeds of \$45,000. Each unit consists of one common share and one share purchase warrant entitling the holder to purchase one share at \$0.05, expiring September 22, 2010. No finder's fee was paid.
- (ii) On July 25, 2011, the Company issued 5,000,000 non-flow-through units at \$0.05 per unit and 2,000,000 flow-through units at \$0.05 per unit pursuant to a private placement for cash proceeds of \$350,000. Each non-flow-through unit consists of one common share and one share purchase warrant, and each flow-through unit consists of one flow-through common share and one share purchase warrant. Each warrant entitles the holder to purchase one common share at \$0.10, expiring July 25, 2012. Fees to the TSX were \$2,500, fees to securities commissions were \$625 and finder's fee paid in cash were \$16,950.

At this time the Company has no operating revenues. Historically, the Company has raised funds through equity financing and the exercise of options and warrants to fund its operations. Financing through the issuance of common shares is affected by certain market conditions including the price of metals. The market price of metals is highly speculative and volatile. Instability in the market price may affect investor interest in mining stocks. If the metal prices substantially decline, this may adversely affect the Company's ability to raise sufficient capital to fund operations including exploration.

## Management's Discussion & Analysis

For the year ended July 31, 2011

### Working Capital

The Company has working capital of \$345,284 at July 31, 2011. The working capital includes \$340,216 cash, \$3,782 in receivables and marketable securities of \$17,500. The marketable securities consist of 100,000 common shares in the capital of Abacus Mining and Exploration Corp., a public company trading on the TSX Venture Exchange. The Company believes the working capital is sufficient to meet its on-going obligations and general operating expenses for the 2012 fiscal year.

### SHARE CAPITAL

The Company is authorized to issue an unlimited number of common shares without par value. The Company issued 7,000,000 shares during the year ended July 31, 2011. There are 43,472,962 common shares issued and outstanding at July 31, 2011.

	Number	Amount	Contributed Surplus
Balance, July 31, 2009	34,222,962	\$ 4,719,187	\$ 686,300
Shares issued for cash:			
Private placement	2,250,000	45,000	-
Balance, July 31, 2010	36,472,962	4,764,187	686,300
Shares issued for cash:			
Private placement	7,000,000	350,000	-
Cost of issuance	-	(20,075)	-
Balance, July 31, 2011	43,472,962	\$ 5,094,112	\$ 686,300

### Stock-Based Compensation

The Company established a stock option plan under which it may grant stock options totaling in aggregate up to 10% of the Company's total number of shares issued and outstanding on a non-diluted basis. The stock option plan provides for the granting of stock options to employees and persons providing investor-relation or consulting services up to a limit of 5%, 2% and 2%, respectively, of the Company's total number of issued and outstanding shares per year. The stock options are fully vested on the date of grant, except for options granted to persons providing investor relation services, which vest over a twelve-month period. The option price must be greater or equal to the discounted market price on the grant date and the option expiry date cannot exceed five years after the grant date.

The Company applies the fair value method using the Black-Scholes option pricing model in accounting for options granted. There are no outstanding options. The following summarizes the Company's stock options as at July 31, 2011 and 2010 and changes during the years then ended:

	2011		2010	
	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price
Outstanding, beginning of year	-	-	450,000	\$ 0.10
Expired			(450,000)	\$ 0.10
Outstanding and exercisable, end of year	-	-	-	-

Discussion  
& Analysis**

**For the year ended  
July 31, 2011**

**SHARE CAPITAL (continued)**

**Warrants**

Details of the Company's warrants as at July 31, 2011 and 2010 and the changes during the years then ended are as follows:

Expiry Dates	Balance July 31, 2010	Issued	Exercised	Expired	Balance July 31, 2011
September 22, 2010	2,250,000	-	-	2,250,000	0
July 25, 2012		7,000,000			7,000,000
Weighted average exercise price	\$0.05	\$ 0.10	-	\$0.05	\$ 0.10

Expiry Dates	Balance July 31, 2009	Issued	Exercised	Expired	Balance July 31, 2010
Sept. 22, 2010	-	2,250,000	-	-	2,250,000
Weighted average exercise price	-	\$ 0.05	-	-	\$0.05

**Flow-Through Common Shares**

On July 25, 2011, the Company issued 2,000,000 flow-through units at \$0.05 per unit pursuant to a private placement for cash proceeds of \$100,000. Funds raised through the issuance of flow-through shares are required to be expended on qualified Canadian mineral exploration expenditures, as defined in Canadian income tax legislation. The flow-through share gross proceeds, less the qualified expenditures made to date, represent the funds received from flow-through share issuances. As at July 31, 2011, there is \$100,000 of flow-through proceeds to be used for exploration.

**INCOME TAXES**

The Company follows the asset and liability method of accounting for income taxes. Under this method, future tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis, and losses carried forward. Future tax assets and liabilities are measured using substantively enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on future tax assets and liabilities of a change in tax rates is recognized in operations in the period in which the change is enacted or substantially assumed. The amount of future income tax assets is limited to the amount of the benefit that is more likely than not to be realized.

## **Management's Discussion & Analysis**

**For the year ended  
July 31, 2011**

### **RELATED PARTY TRANSACTIONS**

There are no contracts with directors or officers of the Company that provide for compensation and transactions are measured at the exchange amount of consideration established with related parties. During fiscal 2011 transactions with related parties were:

- (a) Consulting fees of \$75,500 (2010 - \$72,000) were charged by a company owned by the Chief Financial Officer for financial reporting, investor and shareholder communications, market surveillance, developing marketing materials and bringing the Company to the attention of financial advisors and the investing community, preparing, planning, organizing and supervising the Company's exploration activities, investigating, identifying and conducting negotiations on favourable exploration opportunities, arranging equity financings; and supervising the Company's day-to-day operations including administrative and corporate matters.

### **OUTLOOK**

Operating expenses for the remaining fiscal year are expected to be funded by cash on hand and/or the issuance of shares including the exercise of warrants and options. Financing through the issuance of common shares is affected by certain market conditions including the price of metals. The market price of metals is highly speculative and volatile. Instability in the market price may affect investor interest in mining stocks. If the metal prices substantially decline, this may adversely affect the Company's ability to raise sufficient capital to fund operations including exploration. The current uncertain global market conditions have significantly reduced the Company's ability to finance operations.

Exploration on the Galaxy is planned to continue throughout the 2012 fiscal year. The Company has retained CME Consultants Inc. of Richmond, BC to manage the next drilling program on its copper-gold deposit on its wholly-owned Galaxy Property, located in the Afton Camp in Kamloops, BC. The program will commence once drilling permits are received.

CME created a 3-D model of the Galaxy deposit (announced January 21, 2011) that showed there is potential for additional mineralization on-strike to the southeast and northwest. There is also potential to discover the offset root of the Galaxy deposit, in the footwall of the thrust fault that truncates the mineralization at depth. (View model @ [www.discovery-corp.com](http://www.discovery-corp.com)).

The Galaxy deposit has a strike length of 600 metres and a maximum depth of 140 metres. Discovery-Corp's drill programing will test the strike and depth potential in addition to verifying and infilling historical zones. The goal is to increase the size of the current deposit and assist in moving the deposit toward a NI 43-101 compliant resource. The estimated cost of this phase is \$100,000 and will be completed with cash on hand.
