CME Consultants Retained to Create 3-D model of Galaxy Deposit

Discovery-Corp Enterprises Inc. (the "Company") announces that it has retained CME Consultants Inc. of Richmond, BC to compile historical data on the Company's Galaxy Property, located within the Afton camp in Kamloops, British Columbia. CME will build a 3-D model of the copper-gold deposit on the Galaxy Property.

The data will be used to help target the next phase of diamond drilling on the Galaxy Property. Discovery-Corp intends to implement a drilling program to confirm results from certain historic holes and to test the potential for mineralization at depth below the existing drilling and elsewhere on the claims. In addition, the data compilation will help the Company's preparation of a NI 43-101 compliant resource estimate.

Much of the historic drilling on the Galaxy property was completed prior to Discovery-Corp's involvement in the property and many of the early drill holes lack gold analyses. Discovery-Corp drilled three diamond drill holes in the Galaxy zone in 2006, which returned the following results: (previously released in a news release dated October 16, 2006)

Drill hole	From (metres)	To (metres)	Interval (metres)	Cu (%)	Au (g/t)
GX06-1	23.47	35.94	12.47	0.72	0.46
incl.	24.08	26.12	2.04	2.77	1.47
GX06-2	35.35	41.43	6.08	0.83	0.23
GX06-3	78.02	84.10	6.08	0.49	0.17

Discovery-Corp is a junior exploration company based in British Columbia, Canada that is focused on finding high quality gold and copper properties. Discovery-Corp's properties include the Galaxy, located in the Afton camp in Kamloops, BC and the Rock Creek Ranch, located in North Central Nevada at the intersection of the Getchell and Battle Mountain-Eureka gold trends.

On Behalf of the Board of Directors

Alex Pannu, President
