Discovery-Corp Retains CME to Drill Galaxy Deposit

Vancouver - Discovery-Corp Enterprises Inc. (the “Company”) has retained CME Consultants Inc. of Richmond, BC to manage the next drilling program on its copper-gold deposit on its wholly-owned Galaxy Property, located in the Afton Camp in Kamloops, BC. The program will commence once drilling permits are received.

CME created a 3-D model of the Galaxy deposit (announced January 21, 2011) that showed there is potential for additional mineralization on-strike to the southeast and northwest. There is also potential to discover the offset root of the Galaxy deposit, in the footwall of the thrust fault that truncates the mineralization at depth. (View model @ www.discovery-corp.com).

The Galaxy deposit has a strike length of 600 metres and a maximum depth of 140 metres. Discovery-Corp’s drill programing will test the strike and depth potential in addition to verifying and infilling historical zones. The goal is to increase the size of the current deposit and assist in moving the deposit toward a NI 43-101 compliant resource. The estimated cost of this phase is \$100,000.

-30-

Discovery-Corp is a junior exploration company based in British Columbia, Canada that is focused on finding high quality gold and copper properties. Discovery-Corp’s properties include the Galaxy, located in the Afton camp in Kamloops, BC and the Rock Creek Ranch, located in North Central Nevada at the intersection of the Getchell and Battle Mountain-Eureka gold trends.

On Behalf of the Board of Directors

Alex Pannu, President
